HEALTHCARE EMERGENCIES BOARD POLICY

The Board of Education recognizes the importance of taking appropriate action whenever an emergency threatens the safety, health, or welfare of a student at school or during school-sponsored activities.

The Chief Executive Officer or designee shall develop procedures to ensure that first aid and/or medical attention is provided as quickly as possible when accidents and injuries to students occur and that parents/guardians are notified as appropriate.

Emergency Contact Information

The Chief Executive Officer or designee shall ask parents/guardians to provide emergency contact information in order to facilitate communication in the event of an accident or illness.

Documentation

District staff shall appropriately report and document student accidents. An incident report form should be completed and a Gallagher form provided to the parent or guardian. School nurse and administration should be notified. The School Nurse will debrief, document, follow up, and retrain if necessary.

"Do Not Resuscitate" Orders

The Board believes that staff members should not be placed in the position of determining whether or not to follow any parental or medical "do not resuscitate" orders. Staff shall not accept or follow any such orders except under the specific written direction of the Chief Executive Officer or designee. The Chief Executive Officer or designee may only direct a staff member to follow a "do not resuscitate" order if he/she has received a written parent/guardian authorization, with an authorized health care provider statement, and an order of an appropriate court. The Chief Executive Officer or designee shall ensure that parents/guardians who have submitted a "do not resuscitate" order are informed of this policy.

Emergency Medical Services/Transportation

A student may be transported without parental permission in an emergency arising from an illness or injury to said student. Education Code Section 35350 provides that “No governing board of a school district shall require any student or pupil to be transported for any purpose or for any reason without the written permission of the parent or guardian. This section shall not apply to the transportation of a student in an emergency arising from illness or injury to the student or pupil.”
Except when a written objection to medical treatment (other than first aid) has been previously filed by a parent or guardian, a District is not liable for reasonable medical treatment, even without parental consent when the parent cannot be reached, when a student is ill or injured during regular school hours, Education Code Section 49407 provides that “Notwithstanding any provision of any law, no school district, officer of any school district, school principal, physician, or hospital treating any child enrolled in any school in any district shall be held liable for the reasonable treatment without the consent of a parent or guardian of the child when the child is ill or injured during regular school hours, requires reasonable medical treatment, and the parent or guardian cannot be reached, unless the parent or guardian has previously filed with the school district a written objection to any medical treatment other than first aid.”

Good Samaritans are not liable when rendering emergency care at the scene of an emergency in good faith. Business and Professions Code Section 1799.102 provides that “No person who in good faith, and not for compensation renders emergency care at the scene of an emergency shall be liable for any civil damages resulting from any act or omission. The scene of emergency shall not include emergency departments and other places where medical care is usually offered.”

**Automated External Defibrillators**

The Board authorizes the Superintendent or designee to place automated external defibrillators (AEDs) at designated school sites for use by school employees in an emergency.

The Superintendent or designee shall develop guidelines for employees regarding these devices and shall ensure that employees receive information that describes sudden cardiac arrest, the school's emergency response plan, and the proper use of an AED. The guidelines shall also specify the placement, security, and maintenance of the AED.

The authorization of AEDs in district schools shall not be deemed to create a guarantee that an AED will be present or will be used in the case of an emergency, or that a trained employee will be present and/or able to use an AED in an emergency, or that the AED will operate properly.

**Legal Reference:**

**EDUCATION CODE**

32040-32044 First aid equipment

49300-49307 School safety patrols

49407 Liability for treatment

49408 Emergency information

49409 Athletic events; physicians and surgeons; emergency medical care; immunity

49417 Automated external defibrillators
HEALTHCARE EMERGENCIES PROCEDURES

First Aid/CPR

Office managers are trained in CPR biannually and all staff utilize and follow the Emergency First Aid Guidelines for California Schools created and maintained by the Emergency Medical Services Authority California Health and Human Services Agency.
**Emergency Contact Information**

In order to facilitate contact in case of an emergency or accident, the principal or designee shall annually request that parents/guardians provide the following information:

1. Home address and telephone number
2. Parent/guardian's business address and telephone number
3. Parent/guardian's cell phone number and email address, if applicable
4. Name, address, and telephone number of an alternative contact person to whom the student may be released and who is authorized by the parent/guardian to care for the student in cases of emergency or when the parent/guardian cannot be reached
5. Local physician to call in case of emergency

In addition, parents/guardians shall be encouraged to notify the school whenever their emergency contact information changes.

**Notification/Consent for Medical Treatment**

Whenever a student requires emergency or urgent medical treatment while at school or a school-sponsored activity, the principal or designee shall contact the parent/guardian or other person identified on the emergency contact form in order to obtain consent for the medical treatment.

If the student's parent/guardian or other contact person cannot be reached to provide consent, the principal may seek reasonable medical treatment for the student as needed, unless the parent/guardian has previously filed with the district a written objection to any medical treatment other than first aid.

A person who has filed with the district a completed caregiver's authorization affidavit pursuant to Family Code 6550-6552 shall have the right to consent to or refuse school-related medical care on behalf of the minor student. The caregiver's authorization shall be invalid if the district receives notice that the minor student is no longer living with the caregiver or if the Chief Executive Officer or designee has actual knowledge of facts contrary to those stated on the affidavit. (Family Code 6550)

The caregiver's consent to medical care shall be superseded by any contravening decision of the parent or other person having legal custody of the student, provided that this contravening decision does not jeopardize the student's life, health, or safety. (Family Code 6550)

**Automated External Defibrillators**

When an automated external defibrillator (AED) is placed in a district school, the Chief Executive Officer or designee shall notify an agent of the local emergency medical services
agency of the existence, location, and type of AED acquired. (Health and Safety Code 1797.196, 1797.200)

The Chief Executive Officer or designee shall ensure that any AED placed at a district school is maintained and tested according to the operation and maintenance guidelines set forth by the manufacturer. (Health and Safety Code 1797.196)

The Chief Executive Officer or designee shall develop a written plan which describes the procedures to be followed in the event of a medical emergency, including an emergency that may involve the use of an AED. These procedures should include, but not be limited to, requirements for immediate notification of the 911 emergency telephone number in the event of an emergency that may involve the use of an AED.

The principal of any district school with an AED shall annually provide information to school employees that describes: (Health and Safety Code 1797.196)

1. Sudden cardiac arrest
2. The school's emergency response plan
3. The proper use of an AED

Instructions on how to use the AED, in no less than 14-point type, shall be posted next to every AED. In addition, school employees shall be notified annually of the location of all AED units on campus. (Health and Safety Code 1797.196)

Each AED shall be checked for readiness at least biannually and after each use. In addition, the Chief Executive Officer or designee shall ensure that an inspection is made of all AEDs at least every 90 days for potential issues related to operability of the device, including a blinking light or other obvious defect that may suggest tampering or that another problem has arisen with the functionality of the AED. The Chief Executive Officer or designee shall maintain records of these checks. (Health and Safety Code 1797.196)
